About the Brazilian Internet Steering Committee/CGI.br

The Brazilian Internet Steering Committee/CGI.br coordinates and integrates all Internet service initiatives in Brazil, as well as promoting technical quality, innovation and the dissemination of the services available. It is comprised of members from the government, the corporate sector, the third sector and the academic community, and as such constitutes a unique Internet governance model for the effective participation of society in decisions involving network implementation, management and use. The Portuguese Translation will enable wider consumption of the findings and contribute to internet policy discussions.

About the Internet & Jurisdiction Policy Network

The Internet & Jurisdiction Policy Network is the leading multistakeholder organization addressing the tension between the cross-border internet and national jurisdictions. Its Secretariat facilitates a global policy process engaging over 400 key entities from governments, the world's largest internet companies, technical operators, civil society groups, academia, and international organizations from over 70 countries. Stakeholders currently work in three Programs (Data & Jurisdiction, Content & Jurisdiction, and Domains & Jurisdiction) to jointly develop policy standards and operational solutions to pressing legal challenges at the intersection of the global digital economy, human rights, and security. The organization is also the home of the I&J Retrospect Database tracking global trends and the world's first Internet & Jurisdiction Global Status Report.

The regular Global Conferences of the Internet & Jurisdiction Policy Network are institutionally supported by the Council of Europe, European Commission, ICANN, OECD, United Nations ECLAC, and UNESCO. Partner countries include France (2016), Canada (2018), and Germany (2019). The work of the organization has been presented to and recognized by key international processes, including the UN Internet Governance Forum, G7, G20, or the Paris Peace Forum, and covered in top media outlets such as The Economist, Washington Post, Financial Times, Politico or Fortune. The organization is financially supported by a uniquely diverse coalition of over 20 governments, companies, and organizations.
