

CALL FOR PROPOSALS: Translation services

Internet & Jurisdiction Regional Status Report - Framing, Mapping, Addressing: Cross-border Digital Policy Challenges in Africa

Background: The Internet & Jurisdiction Policy Network partnered with the German Development Agency (GIZ) to undertake a pioneering project addressing cross-border digital policy challenges on the internet. How to handle the coexistence of heterogeneous laws on the cross-border internet is one of the greatest policy challenges of the 21st century. As digital technologies start to underpin economic development and society at large, local African actors need a seat at the table in regional and international policy discussions to amplify their voices on topics that are of crucial importance to them. This was also a key message from the [African Union Commission and Internet & Jurisdiction Policy Network Regional Conference](#) in May 2020.

Objective: The project proposes to complement existing regional mechanisms for stakeholders from the African continent to share knowledge, consult each other, interact with international stakeholders, and develop capacity on addressing cross-border digital policy challenges on the internet.

Outcomes:

- Formal announcement virtual event to launch the project production process
- Amplification of existing regional mechanisms and partnerships
- Recurring workshops to connect local experts and support knowledge exchange
- Launch of an in-depth data collection across the region to map key issues and policy approaches
- **Develop and translate into French and Portuguese: Internet & Jurisdiction Policy Network's African Regional Status Report**
- Consolidate timely information to enable the development of capacity building projects
- Production of related multimedia learning modules
